

Your organization/scholarship name	Will your organization consider applications from home-schooled students who meet all the other requirements of your scholarship? (Specifically, these are students not enrolled in a traditional high school. State rules do require them to follow an approved curriculum.) The goal of our scholarship is to support students who want to become teachers in our public school system. How long has the student been home-schooled? Since the GPA is a large part of our application and is based on the public school transcripts, how would this happen? What in-school activities has the student been involved in? It seems odd that a student who is being home-schooled, would want to become a public school teacher.
